

Zinc Spiral Vane Solid Rigid Centralizer -DZS02

Available in 3 1/2" to 20 "sizes + any special sizes

Zinc Spiral Vane Solid Rigid Centralizer are designed from our experts and provides efficient functionality. These are checked on a regular basis and that are used in different industrial applications. The offered zinc spiral vane solid rigid centralizers are simple and convenient, extensively used for rough and fine polishing of metallurgical specimens.

They are available at cost effective price. This gentle flow from the body to the height of the vane will eliminate scraping, gouging or digging into the formation and consequently reduce balling between the vanes.
