

Wire Scratcher -SC08

Available in 4 1/2" to 20 "sizes + Any special sizes

This comprises of a hinged collar and wire bristles are attached to it. It uses the hinge pins to secure the collars around the casing. On the other hand, the wire bristles are hardened and tempered. The bonding of the cement between the porous formation and the casing is improved with the use of wire scratcher.

The sizes available are standard and customized according the requirement of the clients.
